

D10

NEP Visions has one of Europe's most extensive fleets of OB trucks and TV camera equipment providing the latest in technical standards including high definition, standard definition PAL and NTSC. Visions has a highly skilled core staff of Unit Managers, Vision/Audio Engineers, Cameramen and Cable Riggers and offers clients the choice of fully crewing events or supplying guarantee staff only. Together with a range of lightweight, fast assembly fly-pack kits, NEP Visions can provide clients with continuity of facilities and crew at any televised event anywhere in the world.

D10

Our OB unit, D10, provides the convenience of an in-line unit with all the production power and versatility of a larger OB unit. Based on a large articulated truck chassis it provides a spacious and comfortable production environment including an expanding rear section to accommodate a flat screen monitor stack.

Accommodating up to 20 cameras, and with provision for up to 6 server based record/replay devices and 6 VTR's, D10 is the perfect unit for mid to large sized sports, music and light entertainment events.

D10 and it's sister unit D12 were designed and built by Visions as Standard Definition units but incorporating a High Definition infrastructure - enabling them to be quickly and easily upgradeable to HD in the future.
